Member Of Technical Staff (Automation)

Hyderabad, India | +91-9542427545 | chandu96qa@outlook.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Software Test Engineer with 3+ years of total experience across Tech Mojo Solutions Pvt Ltd and SA Technologies, specializing in manual and automation testing of web-based applications. Skilled in building automation frameworks using Selenium WebDriver with Core Java, Cucumber BDD, and TestNG following the Page Object Model. Experienced in defect management, and end-to-end execution of the STLC across Agile/Scrum projects. Known for strong analytical skills, clear defect reporting, and consistent on-time delivery.

TECHNICAL SKILLS

Manual Testing: Functional Testing, Regression Testing, Smoke Testing, Sanity Testing, Re-Testing, Test Case Design, Defect Life Cycle

Automation Testing: Selenium WebDriver, Core Java (OOPs), Cucumber BDD, Gherkin, TestNG, Page Object Model (POM)

Build & Reporting Tools: Maven, Extent Reports

Version Control: Git, GitHub

Bug Tracking: JIRA

Methodologies: Agile (Scrum), SDLC, STLC

IDE: Eclipse, IntelliJ IDEA

PROFESSIONAL EXPERIENCE

Member Of Technical Staff | Tech Mojo Solutions Pvt Ltd, Hyderabad, India

- Perform manual and automation testing for web-based applications, covering functional, regression, smoke, and sanity test cycles.
- Develop and maintain automation scripts using Selenium WebDriver with Core Java, following the Page Object Model (POM) for reusability.
- Write and execute BDD test scenarios using Cucumber and Gherkin, integrated with TestNG for execution and reporting.
- Analyze user stories and business requirements to prepare test scenarios, test cases, and automation scripts.
- Log, track, and retest defects in JIRA, and coordinate with developers to ensure timely resolution.
- Participate in sprint planning, daily stand-ups, and sprint retrospectives as part of the Agile/Scrum team.

Software Test Engineer | SA Technologies, Hyderabad, India

- Performed functional, smoke, sanity, regression, and re-testing on web applications across multiple sprints.
- Built and enhanced automation test scripts using Selenium WebDriver, Core Java, and Cucumber for end-to-end scenarios.
- Implemented and optimized the Test Automation Framework (TAF) with generic, reusable methods and globalized environment configurations.
- Prepared and executed regression suites and user-story level test scenarios based on business requirements.
- Collaborated with the functional QA team to review test cases and automation scenarios prepared by other team members.
- Reported and tracked defects, communicated with the development team for fixes, and verified resolutions before closure.

- Used Git/GitHub for version control and Maven, Extent Reports for build management and reporting.

PROJECTS

Pragmatic Play – Sportsbook Platform

Company: Tech Mojo Solutions Pvt Ltd Role: Member Of Technical Staff (Automation)

- End-to-end online sports betting platform supporting pre-match and live betting across multiple sports, including Football, Cricket, Tennis, Basketball, and Horse Racing, with real-time odds, live score updates, bet settlement, and Translations management.
